Chile

Employee:
100+

Industry:
Education

Product:
P-Series Cloud Edition

Background

FODEC is an organization dedicated to providing Catholic education in Valparaíso, Chile, focusing on the spiritual, academic, and holistic development of students within a Catholic framework.

Challenges

FODEC has schools located in different parts of the city, even across various regions in Chile, and **they were using an outdated TDM PBX system** for daily communication.

Their challenge was to **upgrade to a modern solution** that would allow directors and employees at each location to communicate clearly and efficiently, as well as provide unified communication tools.

Solution

FODEC decided to upgrade their communication infrastructure by switching to a cloud-based solution. After carefully evaluating different options, they chose the **P-Series Cloud Edition** as their preferred choice.

Feature Highlights

Remote Access Service

Linkus Mobile Client

Results and Benefits

✓ Unify multiple locations

FODEC now establishes an interconnected communication network across its multiple sites. Teachers and faculty staff can make free calls to each other and **collaborate more easily**.

✓ Enhanced mobility

Faculty members are no longer limited by geographical constraints and can access their phone system **from any location** with the help of Linkus UC Clients.

✓ Less IT burdens

Migrating to a Cloud solution has greatly **reduced the maintenance workload**. Besides, administrators can centrally manage all extensions from a web-based portal.

✓ Easy future scalability

For FODEC, migrating from a TDM PBX system to Yeastar has proven to be **a decision that brings high value**. The switch has greatly simplified their daily communication experience.
