Modern VoIP Phone System for Schools

→ Feature-rich | Reliable & Secure | Cost-effective

As the education sector adapts to the demands of the digital age, the importance of effective communication in creating collaborative and engaging learning environments cannot be overstated. However, educational institutions, be it schools or universities, face hurdles such as outdated communication systems and limited budgets. Yeastar recognizes these challenges and has responded by offering affordable solutions designed to meet the needs of institutions of all sizes.

## How Can Yeastar P-Series Phone System Help?

Built with schools in mind, Yeastar's award-winning Unified Communications solutions provide robust and easy-to-use features to constitute safer and better collaborated schools at the right price. By leveraging the leading VoIP and Unified Communications technology, schools can utilize their internet connection without replacing their existing phone, paging system, and security system, radically strengthening safety and collaboration while slashing the overhead cost. The potential savings from adopting Yeastar's solutions can be redirected towards other crucial educational investments.

Solution Benefits At-a-Glance

- Easily integrate with existing phones, paging system, security system, etc

- Seamlessly upgrade analog IT equipment to VoIP

- Public access control anywhere anytime from any device

- Built-in security mechanism to prevent net threats and internal malfeasance

- Facility-wide announcements and agile emergency management

- All-inclusive communications features

- Unified Communications features like presence, instant messaging, file sharing, conferencing, etc

How It Works

The typology demonstrates how Yeastar P-Series creates a connected, agile, and secure environment for both students and teachers.

An Easy-to-use System for Every Role

For Teachers and Staff

- ✓ Business phone app: mobile, desktop, web
- ✓ Unified Communications
- ✓ Personalized calling rules
- ✓ Built-in call recording
- ✓ Voicemail to email
- ✓ Video/audio conferencing

- ✓ Microsoft Teams integration: manage calls directly in Teams

For Administrator

- ✓ User group and organization
- ✓ Call operator panel
- ✓ Call queues
- ✓ Ring group
- ✓ Business hours & holidays
- ✓ Customize greetings and messaging
- ✓ Microsoft Active Directory Integration
- ✓ Microsoft Azure AD Integration

For Students

- ✓ Direct dialing 911
- ✓ Emergency alerts and communications
- ✓ Facility-wide announcement
- ✓ Paging & intercom

For IT Staff

- ✓ Remote management
- ✓ Auto provisioning
- ✓ Point-and-click configuration
- ✓ Compatible with existing phoneinfrastructure
- ✓ Support SIP trunks and PSTN/ISDN phone lines
- ✓ Easy scalability

Yeastar

Yeastar for Education: Common Use Cases

Unified Communications

Enhance communication and collaboration with presence, instant messaging, file sharing, and conferencing, etc.

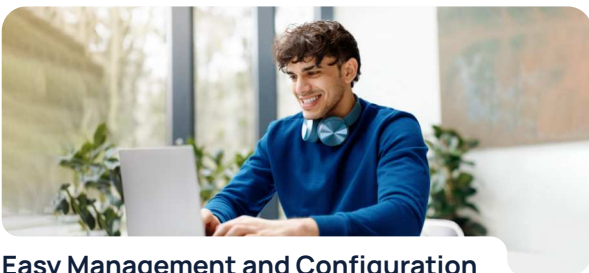

Office Hotline

Optimize call flow, reduce hold times, and handle inquiries efficiently with intelligent call routing, call queues, IVR, and more call center features.

Public Access Control

Control access to school buildings by locking or monitoring doors anywhere from any device.

Easy Management and Configuration

Provision configurations with just a few clicks via intuitive Web GUI.

Emergency Alert

Ensure that everyone in the school is alerted to the emergency by mass notifications.

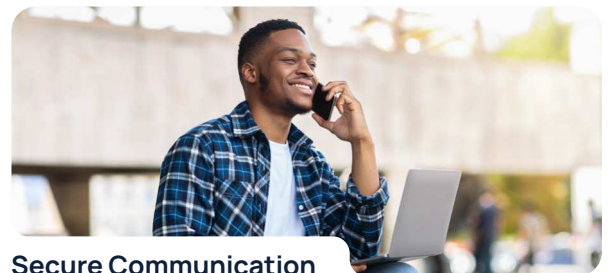

Facility-wide Announcements

Customize bells and paging to broadcast daily announcements and emergency alerts.

Full Integration

Improve school communications and safety by easily integrating phone, paging system and security system.

Secure Communication

Ensure secure communication in schools and higher education with data encryption, firewalls, 2FA, etc
