UPGRADE**

with Yeastar IP PBX Systems

? ISDN Outdated, Expensive Legacy PBX Can't Drop

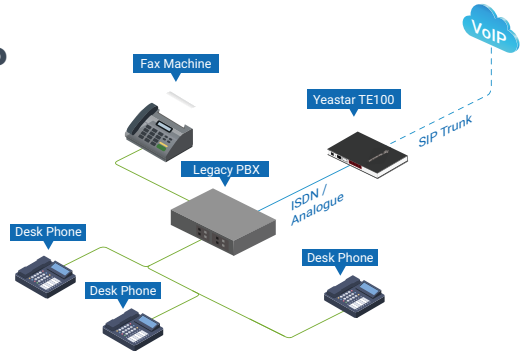

As the world moves from the legacy ISDN to the cost-effective VoIP, many businesses are financially tied to their existing legacy PBX. Initial investment on the legacy equipment is high and can't be replaced overnight.

You want to upgrade your phone line to VoIP, but you can't use a SIP Trunk directly with your legacy ISDN PBX.

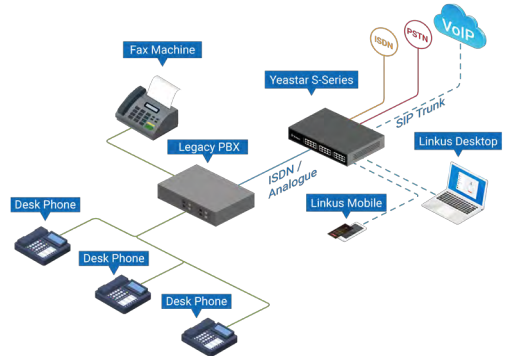

💡 Phased Upgrade to VoIP With Yeastar TE100 Gateway

Use Yeastar TE100 Gateway to connect your traditional ISDN PBX system and SIP Trunk, preserving your existing legacy devices while bringing the true benefits of VoIP.

💡 Future-Proof to VoIP With Yeastar S-Series IP PBX

Use Yeastar S-Series VoIP PBX to connect SIP Trunk and work with your existing traditional ISDN PBX, making a complete, future-proof upgrade with added capacity of remote working, Linkus unified communications softphone (Desktop/Mobile), presence, contacts, CRM integrations and many more.
